Why consider a cloud-based solution?

eVisitor is a cloud-based visitor management software that is affordable, simple to use, yet robust that is used by all types of facilities including healthcare, schools, manufacturing, corporations, warehouses and more.

DEPLOYMENT

- ✓ System installation and training is quick. It can happen in about 1 hour, once your hardware is in place.
- ✓ Deployment of the software is simple and requires minimal, if any, involvement from in-house IT department.
- ✓ Software updates are deployed automatically and seamlessly.

COST

- ✓ Scalable: no limit to the number of systems each facility can have.
- ✓ Unlimited storage capacity included.
- ✓ No capital or ongoing expenses for server hardware, power consumption and space.
- ✓ Cloud-based servers scale up/down according to usage and needs, without any effort or additional cost.
- ✓ Geo-redundant servers – ensures data availability even in the event of a regional outage.

SECURITY

- ✓ Cloud-based data is fully encrypted (in motion and at rest).
- ✓ eVisitor Software is independent. It doesn't integrate with other systems on your network. If your network or servers are compromised, eVisitor will not be impacted.
- ✓ Multi-facility feature allows your administrators to have access to all your eVisitor facilities' data, for consolidated activity reports and shared Flags/Alerts.
- ✓ Access can be restricted to specific IP ranges.
- ✓ eVisitor stores as little Personally Identifiable Information (PII) as possible.
- ✓ eVisitor does not hold any HIPAA data.
