

HIPAA Patient Privacy Sign-in Systems

HIPAA regulations require that patient privacy be protected, EVEN in public waiting rooms. And now compliance just got easier with our choice of sign-in systems

Sign-In Log Sign-in System

This two-part "label/form" keeps patient information confidential and creates an automatic duplicate log of all patients sign-in activity.

Non-Customized

Patient Sign-In

Custom printed with your facility logo and information **PLUS** you choose the fields to meet your needs!

\$126 per box with a duplicate log
\$110 per box without a duplicate log
2,000 labels per box

* \$20 design fee will be added on 1st order for Custom Designs

MediTape Reports Sign-In System

This MediTape Report is designed especially for patient sign-in, but can easily be customized to suit your specific office needs. The patient signs in on the label shown below and staff removes it to affix in the chart. The unique design prevents future patients from viewing the duplicate log showing names of those that signed in before them.

13 labels per 8.5" x 11" sheet, 1,300 labels per box.

MediTape Reports

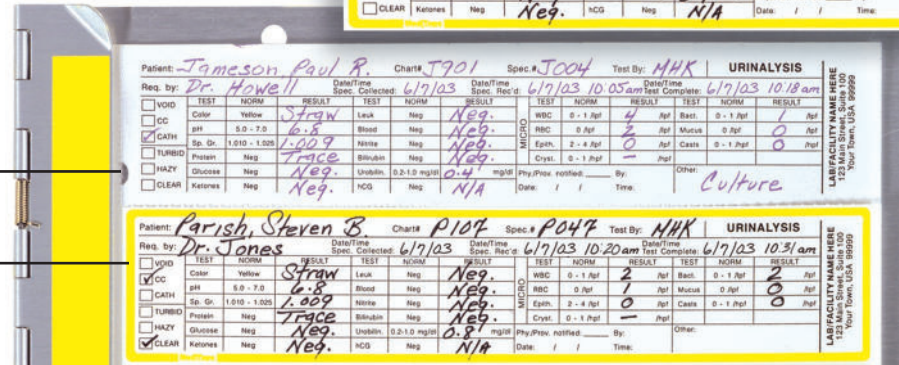

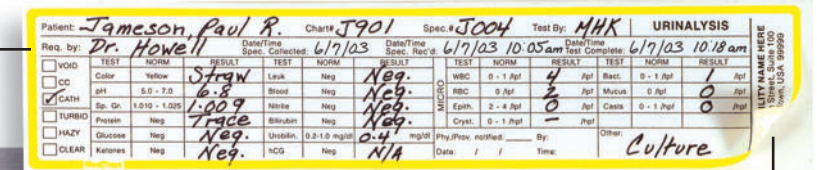

Your Complete Reporting and Record-Keeping Solution

Self-adhesive Reports affix – and stay – anywhere you need them, on patient charts or other records.

One writing gives you a Report and a 3-hole-punched duplicate Record of all office and/or lab activity.

Your choice of 5 border colors make the Reports easy to find in the chart.

Shown: 402 Urinalysis Sets - \$251 | Tapes - \$201
Perforated Reports tear out after writing. A peel-off backing keeps them from sticking until you're ready to put them in the chart.

Here's how MediTape Reports give you complete records in 4 easy steps:

Fill in the Report.
Complete both the Report and the documentation copy in one writing. No transcription errors!

Tear at perforation.
Remove the Report along the perforation and send it to the physician or filing location.

Affix in chart.
Peel the self-adhesive Report off its backing and affix it into the patient's chart – permanently

Keep identical log.
Keep the documentation copy in the MediTape binder for a complete and accurate record.

This symbol denotes MediTape Reports designed to be imprinted with the facility name, address, and normal values and ordered as Report Labels with Duplicate Log (labels with a non-adhesive duplicate record) for CLIA compliance.

Sample Med Record System documents your sample meds in one-third of the time.

Sample Med Record System
Shown: T2T Meds
Size: 3.5" x 1.5"
1,400 medication samples per 100 sheets
\$289.50

Different colored borders help establish a sample meds protocol.

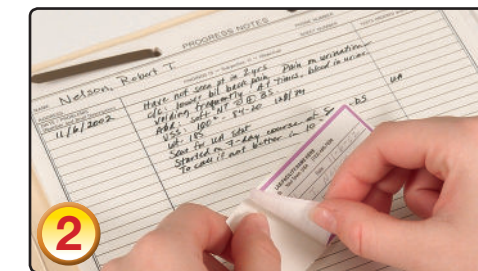

"Most organizations use a simple manual system for the control and accountability of drug samples that is inexpensive and easy to use."

Joint Commission on Accreditation of Healthcare Organizations (JCAHO)

The MediTape Sample Med Record System lets you write it ONCE and get THREE copies!

1 Give written instructions to the patient.
Green-bordered label affixes right to the medication sample so your directions won't get lost, or forgotten, which means fewer phone calls!

2 Update the patient's file. Purple-bordered label affixes to the chart. You know exactly what you dispensed and how you instructed your patient without having to write it again.

3 Keep a separate record of all sample meds together. Pre-punched duplicate log sheet slips easily into the binder. Record useful for drug recalls or inventory.
