

Visitor Management Systems

eVisitor Software Introduction

What it is:

- ✓ A robust yet easy-to-use visitor management system with cloud-based data storage.
- ✓ A Windows-based program that works on your staff's existing computer hardware, such as a desktop, laptop, or tablet.
- ✓ Ideal for any size organization. Available as single or multi-terminal systems.

How it works:

- 1 Sign in visitor with driver's license scanner (a) or reader (b)
- 2 Enter destination or other information with keyboard
- 3 Print badge in color or black and white
- 4 No driver's license? Take a clear photo with the camera. (See "High quality photos" on back page.)
- 5 Create reports

Computer hardware not included.

eVisitor Software Special Features

Track and limit visitors

Know how many visitors are in your building and where they are by:

- 1 The exact room a visitor asks to visit and who is there now
- 2 All rooms in your building and how many visitors are in each
- 3 The total number of visitors in your building

Contact tracing

- 4 Collect visitors' phone numbers or email addresses when they sign in.

The screenshot shows the eVisitor software interface. On the left is the 'Visitor Registration' form for MHS, and on the right is the 'Visitors Log' table. Callouts 1-4 highlight specific features: 1 points to the 'Full Name' field (Brett Clark), 2 points to the 'Visiting' dropdown menu (306), 3 points to the 'Total unique visitors: 20' summary, and 4 points to the 'Phone' field (860-123-4567).

Name	Flag	Company Name	Category	Visiting	Visit Notes	Exp Time
Pat Walsh						
Dana Miller			Visitor	306		

Flag alerts

For returning visitors who were involved in prior incidents.

The screenshot shows the 'Visitor Registration' form for MHS. A red banner at the top of the form reads '2 flagged visitors found. Click here for details.' Below this, the 'Full Name' field contains 'Lisa Davis' and a red flag icon is visible next to her photo. The 'Visitors Log' on the right shows two entries for Lisa Davis, one with a red flag icon and the note 'Refused to wear mask'.

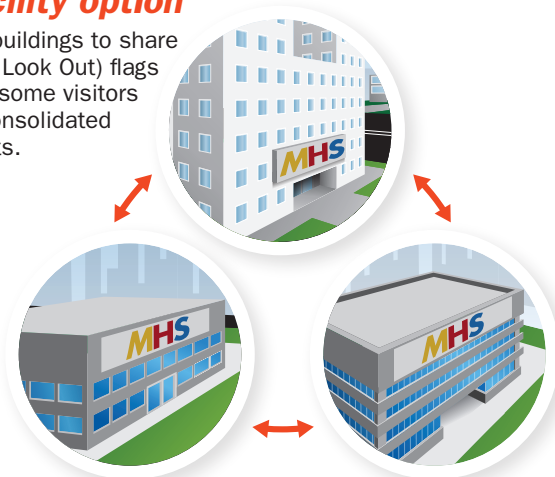

High quality photos

Visitor photos from eVisitor Software are automatically cropped and print clear and crisp for easy identification.

The image compares two visitor photo cards. The left card, labeled 'Photo from other software', shows a blurry and poorly cropped photo of Lisa Davis with a red 'X' over it. The right card, labeled 'Photo from eVisitor Software', shows a clear, high-quality photo of Lisa Davis with a professional layout including her name, company (MERCY MEDICAL CENTER), and visit details.

Multi-facility option

Link all your buildings to share BOLO (Be On Look Out) flags about troublesome visitors and create consolidated activity reports.

Custom dropdown menu

Categorize visitors however you want.

The screenshot shows the 'Visitor Registration' form with a custom dropdown menu open. The menu options are: Visitor, Escort Required, ICU, Screened, Vendor, and Emergency. To the right, four visitor photo cards are shown, each with a different category label: 'MHS VISITOR', 'MHS SCREENED', 'MHS VENDOR', and 'MHS EMERGENCY'. Each card displays the name 'BRETT CLARK' and visit details.
