

# eVisitor Software Introduction

### What it is:

- ✓ A robust yet easy-to-use visitor management system with cloud-based data storage.
- ✓ A Windows-based program that works on your staff's existing computer hardware, such as a desktop, laptop, or tablet.
- ✓ Ideal for any size organization. Available as single or multi-terminal systems.

### How it works:

- 1 Sign in visitor with driver's license scanner (a) or reader (b)
- 2 Enter destination or other information with keyboard
- 3 Print badge in color or black and white
- 4 No driver's license? Take a clear photo with the camera. (See "High quality photos" on back page.)
- 5 Create reports

Computer hardware not included.

Shown:  
**Desktop** version.

**Kiosk** version for visitors to sign themselves in.

# eVisitor Software Special Features

## Track and limit visitors

Know how many visitors are in your building and where they are by:

- 1 The exact room a visitor asks to visit and who is there now
- 2 All rooms in your building and how many visitors are in each
- 3 The total number of visitors in your building

## Contact tracing

- 4 Collect visitors' phone numbers or email addresses when they sign in.

The screenshot shows the eVisitor software interface. On the left is the 'Visitor Registration' form, and on the right is the 'Visitors Log' table. Numbered callouts highlight specific features: 1. The 'Visit Category' dropdown menu. 2. The 'Visiting' room dropdown menu. 3. A yellow callout box showing 'Total unique visitors: 28'. 4. The 'Phone' and 'Email' input fields.

## Flag alerts

- 5 Flag alerts to mark visitors requiring attention. A Red Flag prevents badge from printing for added security.

The screenshot shows the eVisitor software interface. In the 'Visitor Registration' form, a red flag icon is visible next to the visitor's photo. In the 'Visitors Log' section, a red 'X' is overlaid on a visitor's photo, indicating a flag alert.

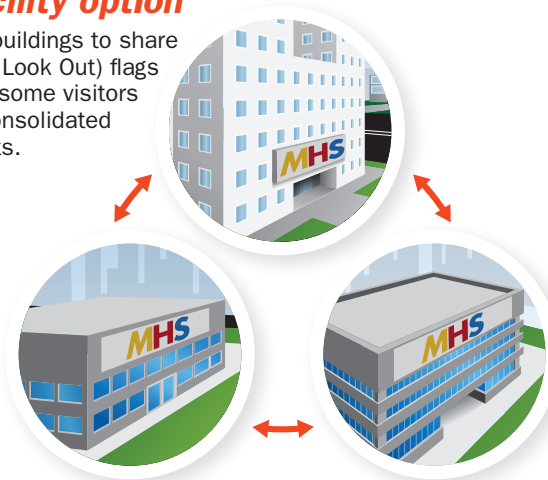

## High quality photos

Visitor photos from eVisitor Software are automatically cropped and print clear and crisp for easy identification.

The image compares two visitor photos. On the left, a standard photo is shown with a large red 'X' over it, labeled 'Photo from other software'. On the right, a high-quality, cropped photo is shown, labeled 'Photo from eVisitor Software'. The high-quality photo is used for a visitor badge that includes the visitor's name, department, and expiration date.

## Multi-facility option

Link all your buildings to share BOLO (Be On Look Out) flags about troublesome visitors and create consolidated activity reports.

## Custom dropdown menu

Categorize visitors however you want.

The screenshot shows the eVisitor software interface. A custom dropdown menu is shown in the 'Visit Category' field, with options: Visitor, Escort Required, Screened, Vendor, and Emergency. The dropdown menu is highlighted with a yellow box. To the right, several visitor badges are shown, each with a different category: MHS VISITOR, MHS SCREENED, MHS VENDOR, and MHS EMERGENCY.
